Dimmable, 50,000 hour life, indoor/outdoor.

Stop by and see our new expanded display!

Prices range from \$94-\$119

We hope you and your family had a wonderfully green holiday season, filled with LED holiday lights, recycled wrapping paper and locally-grown feasts. But one thing people tend to forget are batteries. If you and your little ones got lots of new gadgets, consider using rechargeable batteries. If you have questions about which ones last the longest and where to get the best chargers, give us a call or stop by.

To kick the new year off right we did some rearranging and organizing in our lighting room. We added new items and increased stock of others, so to make room we are getting rid of some floor models, open-box stock and discontinued items. Next time you're in the store, be sure to check out the Watt Works Clearance Table for savings on LED and cold cathode lamps.

And fight cabin fever by checking out the list of upcoming "green" events in Columbus.

Happy New Year!

### → Low-Cost and No-Cost Ways to Save Energy and Money

Since we are all likely recovering from the holiday spending frenzy, we thought it would be nice to offer our readers a list of low-cost and no-cost tips that can help you save energy and money. These tips, courtesy of the Alliance to Save Energy, can help you start saving right now.

- Check the furnace or air conditioner (AC) filter each month, and clean or replace it as needed. Dirty filters block air flow through your heating and cooling systems, increasing your energy bill and shortening the equipment's life.
- When cooking, keep the lids on pots. Better yet, use a microwave oven instead.
- On winter nights, put an extra blanket on the bed and turn down your thermostat more.
- Seal and weatherstrip your windows and doors to ensure that you're not wasting energy on heat or air conditioning that escapes through leaks to the outdoors.
- Lower the temperature on your water heater. It should be set at "warm," so that a thermometer held under running water reads no more than 120 degrees.

For the whole list, stop by Watt Works and pick up a free copy.

## Upcoming Events

Shake off those winter blues with these upcoming "green" events.

### **Sustainable Upper Arlington presents "The Truth About Energy Efficient Lighting"**

Presented by Don Hall of Watt Works

January 13, 2010, 6:45pm

Covenant Presbyterian Church, 2070 Ridgecliff Road, Upper Arlington

Don will speak about the latest technologies and the benefits and risks of energy-efficient lighting. Watt Works has donated a CFL recycling box to Sustainable Upper Arlington - bring your used, but not broken, CFL's to be recycled.

---

### **Ohio Capital City Chapter of the Association of Energy Engineers Local Chapter Meeting**

Friday, January 22, 2-3pm

Center for Automotive Research (OSU), 930 Kinnear Rd., Columbus

Activities include:

- Updates on state programs available from Mr. Tony Sutor, Industrial Efficiency Lead, Ohio Department of Development/Ohio Energy Office
- A brief presentation from Mr. Rich Housh, President & CEO, Juice Technologies & Plug Smart
- Optional tour of the CAR facility

Please RSVP to [capitalcityaee@gmail.com](mailto:capitalcityaee@gmail.com) by January 20th.

To learn more, visit our [Local Chapter Website](#) or check out the [CAR website](#). You can also find directions to the meeting at <http://car.eng.ohio-state.edu/directions>.
